GENERAL NOTES

A filled in circle, ●, before a listing indicates that the compilers are especially interested in obtaining more data on this listing.

Generally, surnames are in capitals and first names are lower case. However, a capitalized FIRST name in the FIRST name column means that the female was not born DAVIS, but married a DAVIS. However, there are many listings where this code has not yet been incorporated.

TOTAL NO. Title page shows '2800', which applies only to the FIRST name column. There are perhaps 700 more names in the 'Father' and 'Mother' columns which are not yet in the FIRST name column. So total DAVIS names herein is about 3,500.

DATES At the beginning of this project, the Year Mon DD system of dates was chosen in order to have a simple command to retrieve from the computer a list such as -- all Williams born in VA between 1860 and 1880. Now researcher #600 has learned the command for getting the same list with the date system of Mon DD, Year. Therefore, future additions to this list might have the Mon DD, Year date system and possibly all dates can be put in the Mon DD, Year system.

First number in REMARKS column is the age at death. Other nomenclature is explained under abbreviations.

REF. NO. In REF column, a three digit base number refers to a researcher, and a four digit base number refers to a document. Dash numbers refer to a page number or item number. To find originator of a document, use only the first 3 digits and refer to the researcher chart on page 64.

COMPUTER USED

This information was entered into an IBM computer via a keyboard. Software used was dbIII+. Many inputs were in typed form (many formats) and some were handwritten and on a form such as shown by page 69. The hours used ? Please don't ask.

For anyone interested in the structure (Titles on the discs) of chart 1, it is included here. If discs are appended to each other, the structure must match exactly. (Note -- one 'e' was elited in 'REFERENCE').

Particular letters of the alphabet were put on particular discs to facilitate sorting --- Disc 1, A-E; 2, F-J; 3, K-S, 4, T-Z.

Field Name	Type	Width
NAME	Character	30
ST	Character	1
EDUC	Character	1
BORN	Character	10
DEATH	Character	10
SEX	Character	10
SPICE	Character	10
FOOTER	Character	5
NOTES	Character	10
PLACE NAME	Character	10
REMARKS	Character	30
REFERENCE	Character	8

Total: ** 125

Further computer entries will involve anoptical character reader (OCR) which will 'read' a typed chart and input it directly onto the disc without use of the keyboard. This should involve about 10% of the time that keyboarding requires. Use of an OCR would require very clear typed copy and probably all input would need to be typed to the same format. A possible form suitable for inputting is included as page 70. Use of an OCR could start as soon as the summer of 1992, but more likely in 1993 or after.

AVAILABILITY & UPDATING

This document is not available directly from the compilers, but can be copied or purchased? at libraries and Gen Societies in the following cities:

Ashland	Kirkwood, MO	Richmond
Charleston	Los Angeles	Salt Lake City
Huntington	Morgantown	Winfield
Dunbar		

If convenient, please lend a copy of this document (all or part) to your favorite DAVIS researcher, to your nearest library, and possibly to the County Clerk --- for them to copy and return original to you.

Additional information on these and other DAVISes (ancestors and researchers) is needed for future updates. Please send info to any researcher listed on front cover.

Researcher #600 would like the name and address of anyone listing the following surnames by computer:
DAVIS HENSLEY GRANT KITCHEN

WISHES **HAPPY HUNTING !!!**
